**Installing Symantec Norton AntiVirus**

1. Insert CD
2. If it doesn't automatically start, click on start/run/browse to setup.exe (usually on the D drive). OK
3. Click on "Install Norton AntiVirus 2003".
4. Welcome. Click on Next..
5. I accept. Click on Next.
6. If a prior version is installed, it will be removed. Click on Next.
7. Install location. Click on Next.
8. Ready to install. Click on Next.
9. Updating system.
10. Readme. Click on Next.
11. Successfully installed. Finish
12. Must restart the system. Click on Yes. Leave the CD in the computer.
13. Registration
14. US. Click on Next.
15. Contact options. Check only the box for "email". Unclick the other options. Click on Next.
16. First and last name. Me. Click on Next.
17. Address and email. Click on Next.
18. Survey. If you don't want to participate in the survey, click "Click on Next.".
19. Register; internet. Make the internet connection. Click on Next.
20. Write down your registration number. Click on Finish.
21. Thank you for registering.
22. Note the subscription expiration date. Click on Print. (Keep the printed page in the manual). Click on Next.
23. Click "Yes, I'd like to use RapidRegistration".
24. Post install tasks.
    a. Leave "Run LiveUpdate" checked.
    b. Leave "Scan all drives for viruses" checked.
    c. Unclick "Create a Rescue Disk Set".
    d. Unclick "Schedule weekly scans of local hard drives".
    e. Click on Next.
25. The default option for LiveUpdate is "automatic", so Norton AntiVirus will automatically check for updates to virus definitions and itself (the program).
26. Summary. Click on Finish.
27. Welcome to Live Update. Click on Next.
28. Updates are found. Click on Next.
29. Updates are being downloaded.
30. Updates are being installed. Click on Finish.
31. Remove the CD.
32. Reboot is needed to finish the installation. Reboot the computer now. Click on OK.
33. If the computer does not automatically reboot, you must manually reboot by clicking on Start, Shutdown, OK.

34. Rebooting will take longer than normal, while the Norton AntiVirus files are being integrated into the operating system.
35. Scan progress: scan for viruses. The number of scanned files will probably be over 40,000.
36. Scan: summary. (Hopefully 0 files infected). Click on Finished.
37. System status: OK. Close this window.
